

AVW Controls Ltd

Company Profile

AVW Controls Ltd is a company with an enviable reputation for stage automation. Based in the UK, AVW is showing the way ahead for affordable automation of stage machinery. AVW has a fully equipped workshop for control panel manufacture, a project office with the latest computer aided design tools and a small team of specialist engineers.

Services available from AVW include control panel design and manufacture, the award winning *Impressario* motion control system and specialist consultancy services. The ever growing list of successful projects is testament to the dedication of AVW in helping our clients achieve their motion control goals. We can design and manufacture automation systems ranging from simple fixed speed switchgear to the most complex computer controlled automation systems for stunning stage spectacles! We are specialist stage automation engineers; we do not do anything else!

IMPRESSARIO

Stage Automation

So What is Stage Automation?

Stage automation is the appliance of imagination and technology to move stage machinery by electronic motion control systems.

A modern stage show, whether it be theatre, concert, dark ride or trade show requires expert lighting, sound and increasingly nowadays - motion control. Scenic elements have to be moved reliably at the correct speed to the correct position smoothly, quietly show after show. A motion control system is, therefore, a must for any modern venue that has to fulfil the demanding expectations of today's audiences.

A motion control system also brings other benefits. Shows that are required to run identically each performance such as Broadway/West End musicals, opera, reparatory or rock 'n' roll benefit from reduced running costs. Safety integrity is increased because a single operator is in control of all moving elements and problems due to "communication breakdown" are minimised. In particular, powered flying systems reduce the risk of injury to personnel caused by traditional counter-weight systems. AVW Controls Ltd specialise in rigging and scenery motion control. We do not do anything else. We have designed and manufactured many installations around the world to make live entertainment truly moving.

“Making live entertainment truly moving”

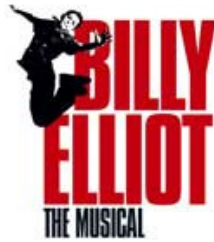

References

The list of projects for AVW Controls shows an impressively diverse range of activity, from our speciality; show automation to powered flying systems, curtain controls, stage revolves to lighting bridges and elevator systems.
